Companion Grasses

Synopsis

What does it mean to dwell in a place? These adventurous poems go on foot in search of answers. Walking the cities, coasts, forests and mountains of Northern California and New England, they immerse themselves in the specifics of bioregion and microclimate, and take special note of the cycle of death and rebirth that plays out dramatically in California's chaparral and grasslands. Inspired by Transcendentalism, *Companion Grasses* sees the sacred in the workings of the material world, but its indebtedness to the ecological tradition of California poets like Gary Snyder and Brenda Hillman means that it also unearths such evidence in the sensual materiality of words themselves. Both ecologically rich landscapes and highly rhythmic inscapes, these poems set seasonal and human dramas side-by-side, wresting an original, signature music from the meeting of site and sight. In pursuing an aesthetics situated in place, they compose an ethics of what it means to be a human companion to the natural world: "What we love, how we care for it,/is where we live." •

Customer Reviews

One of the best books of poetry I've read all year! The poems are subtle and seemingly quiet, but there is so much energy underneath! The landscapes and lives Teare writes about live on these pages. So much beauty here.
